HELENA INDEPENDENT - RECORD HELENA, MONTANA

AUGUST, 1965

Brisk Montana Economy Keeps Setting New Records

Non-Farm Jobs Hit All Time High—The Montana economy is just plain determined to keep on setting new employment records this year. July was the seventh consecutive month this year to record higher levels of nonfarm employment over the same months a year ago. July 15th estimates compiled by the Commission in cooperation with the U.S. Bureau of Labor Statistics revealed a record breaking July employment total of 185,500 nonfarm wage earners. This total exceeded July, 1964 employment by 3,200 workers, and bore out earlier predictions that non-farm employment this year would exceed the 185,000 mark. Reflecting the seasonal aspects of Montana's economy, the July employment total was 18,500 above the seasonal low of last February.

July Hiring Widespread—Increased hiring by nearly every industry segment highlighted the Montana economy during July. Employment was up in six basic industry groups, one showed no change, and another posted a normal seasonal decline for this time of the year. Comparisons with July, 1964 employment figures show substantial gains this July in five industries while moderate declines occurred in three others.

Construction Keeps Good Pace—Payrolls of construction contractors at 14,000 were 200 heavier in July than in June, and exceeded July, 1964 by 800 workers. Work on some highway and building projects was interrupted at times by bad weather. As the weather

cleared, the work pace quickened and shortages of experienced building craftsmen and heavy equipment operators developed in some areas.

Main Street In High Gear—Retail trade firms added 400 workers to July payrolls and chalked up a sizeable increase of 1,400 over July of last year. Good summer buying trends coupled with unusually good tourist traffic kept trade activities at high volume. The opening of new supermarkets and other trade firms throughout the state contributed to the employment picture. Worker shortages persisted in many classifications including cooks, waitresses, maids, and sales clerks.

Other Trends—Over-the-month employment gains were also recorded in manufacturing, up 400; mining, up 100; transportation, utilities and communications, up 300; and the service industries, up 300. Payrolls of finance, insurance and real estate firms, at 7,000 showed no change. The only decline from June payrolls was in government with a decline of 1,800. The drop was all at the state and local level and reflected the seasonal release of workers in education fields. Payrolls of federal agencies showed an increment of 300, mostly seasonal workers hired for summer projects.

Unemployment Compensation Observes a Birthday—Born of economic strife and distress in the mid-30's, the Unemployment Compensation marked a healthy 30th anniversary on August 14th. Signed into law on August 14,

1935, the Social Security Act made it possible for the creation of a nation-wide system of unemployment insurance. Montana became a partner in this federal-state relationship on March 16, 1937, when the Montana law became effective. The first unemployment benefit check in Montana was issued on July 22, 1939. Since that time and through June 30th of this year a total of \$115.3 million in unemployment benefit checks have provided unemployed workers with some purchasing power for rent, groceries, clothes, and other necessities during terms of unemployment. Since the beginning of the program in Montana, the number of workers insured under the program has increased from \$4,000 to 113,000, the amount of the average weekly benefit has risen from \$11.20 to \$31.20, and the maximum duration for which benefits may be drawn has lengthened from 16 weeks to 26 weeks.

Montana Has 75 In Job Corps—Seventy-five young Montana men are now enrolled in work and study programs in job corps camps throughout the United States. Eleven others are now awaiting camp assignments and transportation orders. Seventeen of the young men were enrolled from the Butte area, 11 from Billings, 9 from Great Falls, 5 from Missoula, and 4 each from Anaconda, Bozeman, Helena, and Kalispell. The remainder were from smaller communities throughout the state. The Job Corps program is designed to help young people who are out of school and cannot find a job.

LABOR TURNOVER RATES IN MANUFACTURING AND MINING INDUSTRIES

(per 100 employees)

(Compiled in cooperation with U.S. Bureau of Labor Statistics)

Along the Hiring Line— Field Summary for July 1

ANACONDA, Deer Lodge, Phillipsburg—(354 jobseekers, 152 new, 221 men, 133 women). Job placements in industry down from last month and last year due to slowdown in manufacturing hires. Temporary shutdown of Garrison phosphate plant also a factor. Trends in other industry segments hold to good seasonal levels.

BILLINGS, Columbus, Hardin, Laurel, Red Lodge, Roundup—2,137 jobseckers. 861 new, 1,358 men, 779 women). Area employment trends holding firm in most industry groups with some already at peak. Construction, trade, service, and agriculture all exhibit good activity. City building permits during July totaled over \$1 million, with \$795,000 in new construction. Good tourist traffic augurs well for main street trade and service firms. After slow start early in July, farm hiring made brisk demands for grain harvest.

BOZEMAN, Ennis, Three Forks, Trident—(196 jobseekers, 219 new, 99 men, 97 women). Construction most active force on local labor market scene. Activity in trade shows slight decline as constuction of new main street hampers traffic. Main street business in surrounding resort towns at high volume. Peak employment in logging and sawmills to continue until checked by bad weather.

BUTTE, Virginia City, Whitehall—(1,172 jobseekers, 328 new, 749 men, 423 women). Employment in construction, trade and service industries at high point for this season. Right-ofway problems held up some highway construction releasing 25 men. Demand for experienced hard rock miners increasing; plans underway to train 50 student miners.

cut bank—(135 jobseekers, 24 new, 97 men, 38 women). Farm economy appears most optimistic sector of area. Grain crops should bring record yields. Several construction projects active but little hiring in evidence. Lengthy labor dispute on main street still causing concern.

DILLON—(124 jobseekers, 130 new, 86 men, 38 women). Active agenda of industrial and farm projects keeping area economy on firm basis. Variety of construction includes bridge, overpass and highway projects, commercial buildings, homes and remodeling projects. More than 100 workers placed on farm jobs.

MONTANA CIVILIAN WORK FORCE

(In Thousands)

(Non-agricultural Wage					
& Salary)	185.5	185.6	182.3	1	3.2
Total Agricultural Employment		44.3	52.0	4.1	3.6
Labor Management Disputes		.2	.2	.2	.2
Total Unemployment		10.2	9.1	-1.6	 .5
Percent Unemployed		3.8	3.3		
U. S. Unemployment Rate		5.5	5.0		

GLASGOW, Fort Peck, Malta, Opheim—(174 jobseekers, 64 new, 67 men, 107 women). Job hires in construction, trade, and service show some decline from last year. Lack of construction projects and related hiring activities kept unemployment claim totals over year ago. Normal seasonal demand for hay hands during July.

GLENDIVE, Circle, Wibaux—(137 jobseekers, 63 new, 72 men, 65 women). Area economy fails to match vitality of last year. Construction at all time low for this time of year. New bank building and few homes comprise building construction; no highway work in progress. Oil field work slowed with some layoffs. Brisk farm labor activity.

GREAT FALLS, Choteau, Fort Benton, Stanford—(1,124 jobseekers, 410 new, 511 men, 613 women). Trade and service firms provided most job openings during July. Fairly active trends also prevailed in construction and manufacturing. Summer work for U.S. Forest Service made 75 jobs. Good crop conditions cover entire area with heavy demand for harvest hands expected as harvest advances.

HAMILTON, Stevensville—(275 jobseekers, 54 new, 146 men, 129 women). Active hiring occurred in industry and farm during July. Construction agenda includes two churches, retail store, and rest home. Some forest service hiring but not on par with last year. Heavy demand for timber fallers and carrpenters.

HAVRE, Chinook, Harlem—(103 job-seekers, 4 new, 50 men, 53 women). Industrial job placements below last year due chiefly to less hiring in construction fields this season. Heavy rains during much of July held up some building projects. Brisk hiring trends on farm front with worker shortages developing.

HELENA, Boulder, Garrison, Townsend, White Sulphur Springs—(783 jobseekers, 249 new, 379 men, 404 women). Fair labor demand in most industries during July with exception of food service and lumbering and logging where worker shortages existed. Construction maintains steady trends despite some decline in heaving building. Good activity in tourist oriented industries.

KALISPELL, Columbia Falls, Eureka, Libby, Whitefish—(702 jobseekers, 380 new, 467 men, 235 women). July hiring gains most noticeable in lumber and metal manufacturing. Expanded plywood production and increased demand for logs kept lumber industry active. Good upswing also noted in retail trade. Addition of new potline at Columbia Falls aluminum plant made more new jobs.

LEWISTOWN, Harlowton, Ryegate, Winnett—(95 jobseekers, 92 new, 36 men, 59 women). Upswing in hiring for various agricultural activities dominated the July labor market scene. Youth and migrant labor made up much of the labor supply for these jobs. Industry hiring shows but slight increase over year ago. Work continues on \$1.6 million in construction projects, both highway and building.

LIVINGSTON, Big Timber—(119 jobseekers, 66 new, 62 men, 57 women). Employment directions in industry and agriculture keeping at good seasonal levels. Increased tourism spurred demand for cooks, waitresses, maids, etc. Demand for young workers in Yellowstone Park continues. Stepped up pace in logging and lumbering created shortages of equipment operators and mill hands.

MILES CITY, Baker, Ekalaka, Broadus, Jordan, Terry—(182 jobseekers, 96 new, 76 men, 106 women). Adverse effects of hail damage to farm crops

^{*}Preliminary Estimate

Along the Hiring Line— Field Summary for July 1

transmitted to main street business with noticeable decline in consumer spending. Sugar beet losses of from 50 to 75 per cent estimated on 2,500 acres.

MISSOULA, Drummond, Arlee Superior—(1,645 jobseekers, 504 new, 999 men, 646 women). All facets of local economy enjoying optimistic trends with peak employment reached on many. Substantial employment gains noted over last year. Hiring for government projects and facilities nearly doubled, mostly for summer projects. Construction, trade and service, and manufacturing stay in high gear.

POLSON—(209 jobseekers, 90 new, 159 men, 50 women). Labor demand starting to level off with best employment months past. Construction active on three projects including bridge, night club, and beehive factory, but little hiring on any. Logging and mills on an on-again off-again schedule. Farm labor demand down due to poor cherry crop.

SHELBY—(116 jobseekers, 49 new, 78 men, 38 women). Unsettled weather disturbed hiring activity in construction, oil fields, and farm during July. Seasonal trends keep main street trade and service volume fairly active. New super market construction to start in August. Farm labor demand up for harvest.

SIDNEY—(93 jobseekers, 41 new, 42 men, 51 women). Healthy employment trends cover farm and industry segments of economy. Wheat, sugar beets, and bean yields are expected to be record setters. Nearly 1,000 on farm jobs during July. Major construction projects include Sidney bank and school at Culbertson.

THOMPSON FALLS, Hot Springs—(77 jobseekers, 44 new, 51 men, 26 women). Labor market activity in industry and farm exhibited good vitality during July. Farm job placements double the 1964 figure. Logging and lumbering set the hiring pace, followed by demand from forest service projects. Main street trends stable.

WOLF POINT, Plentywood, Scobey—(155 jobseekers, 49 new, 113 men, 42 women). Increased hiring noted in construction and oil field activities during July. Three drilling rigs began work; field exploration work active with 6 crews in area. Replacement hiring in trade and service firms will shape-up late August as employed students leave for school. Over 100 placed in farm work.

- (1) Estimates include all full and part-time wage and salary workers who worked or received pay during the pay period ending nearest the 15th of the month. Proprietors, firm members, personnel of the armed forces, domestic servants, and self-employed persons are excluded.
- (2) Preliminary estimates based on return from samples of 820 selected Montana establishments.
- (3) Figures previously released have been revised on return from 1,223 such establishments.
- (4) Includes fabricated metal products, machinery except electrical, furniture, stone and clay products.
- (5) Includes apparel, chemicals, and miscellaneous manufacturing products.
